

USMCA Passage is Critical for Nevada Manufacturers and Workers

ECONOMY AND EXPORTS

Trade is important for Nevada, helping Nevadans sell more of what they make to more customers around the world. More sales equal more well-paying jobs and a stronger economy across the state. Nevada's ability to sell more American-made products to Canada and Mexico is tied directly to tariff-free and rules-based trade in North America.

Nevada Without the U.S.–Mexico–Canada Trade Agreement: Less Manufacturing and Fewer Jobs

Without tariff-free trade across North America secured by a strong trade agreement, Nevada’s manufactured goods exports to Canada and Mexico could face a minimum of \$29 million to \$214 million in extra taxes (compared to zero tariffs today).

As a result, many of Nevada’s manufacturers and the workers and communities they support would lose sales as competitors from Europe and Asia continue to enjoy zero tariffs. The result would be less manufacturing production and fewer well-paying American jobs in Nevada and throughout the United States.
